

StarLube™ 5442

Slightly cationic polypropylene emulsion

Product Description

StarLube™ 5442 is a slightly cationic polypropylene emulsion that is used to provide lubricity to fiberglass. It is a film former that protects the fiberglass from self-abrasion and also provides excellent fiber-to-fiber and fiber-to-metal lubricity. StarLube™ 5442 also has good cohesion properties.

Special Properties

 Compatible with many cationic and most anionic agents that may be used in the fiberglass process.

Typical Physical Properties*

Appearance	opalescent liquid
Color	tan to brown
Specific Gravity	0.95
Ionicity	.cationic
pH (100%)	.9.0–10.0
Odor	.mild/bland
Viscosity (Brookfield)	<500 cps
% Solids	31.0–33.0
Solubility	dispersible in water

^{*} These items are provided as general information only. They are approximate values and are not considered part of the product specifications.

Application

StarLube[™] 5442 may be used in varying concentrations to desired end use. Suggested levels of 1% to 5% owb in pad and spray applications, then dried to enhance film forming properties.

Storage

StarLube[™] 5442 has excellent storage stability. It is resistant to scorching at high temperatures.
